3	Local	Nordelph PC	New bus shelter for school children	£3,877.00	£3,877.00	100%	12/20	Supported by NCC	Approval - Community Facility	£3,877.00	To provide a reverse bus shelter at the existing school bus drop-off and pick-up location for the school children of Nordelph o/s 10 & 12 Silt Road.	There has never been a bus shelter to provide protection from the weather for the school children of Nordelph. The location is in a very exposed rural area and would provide much-needed shelter for the children and other residents who use this bus stop.
4	Local	Nordelph PC	Four new footway lights	£8,000.00	£8,000.00	100%	13/20	Supported by NCC	Approval - Open Space/Leisure	£8,000.00	The parish of Nordelph currently has 4 street lights only. The parish council would like to provide 2 street lights for the High Street to provide safe passage for users of the Village Hall back up the High Street to their homes and 2 street lights for Coronation Avenue which currently has no street lights at all but serves 14 properties.	Nordelph is a small hamlet with limited services and facilities but it DOES have a vibrant village hall community; in the darker months the High Street is VERY dark and particularly the users of the village hall (mainly women I hasten to add) find it quite uncomfortable at times walking home with only the current 2 street lights serving the length of the road; a further 2 lights would provide enough coverage to give pedestrians the added security they feel they need to get home safely. Coronation Avenue currently has NO footway lights at all and serves 14 properties, roughly 50 residents. Coronation Avenue is at the extremities of the parish and footway lighting at this location would provide the residents with much needed security that they feel they need when walking home, particularly the school children when it can be dark by 4pm.
5	Local	Emneth PC	Replacement bus shelter	£2,497.50	£4,995.00	200%	18/20	Funding from Parish & NCC	Approval - Community Facility/Leisure	£2,497.50	The current wooden bus shelter is very old and dilapidated and in need of replacing. This shelter serves a large proportion of the Emneth/Elm community travelling into and back from Wisbech town centre.	This bus stop/shelter serves a large proportion of the Emneth/Elm community (particularly the elderly being situated opposite Elmfield Drive which is predominantly bungalows housing elderly residents). The current shelter is in a very poor state of repair and needs replacing.
9	Local	Hunstanton TC	Hunstanton Community Centre Height Restriction Barrier & Gatea	£4,250.00	£8,500.00	200%	17/20	Funding from Parish & CIL	Approval - Leisure/Community Facility - Public Safety	£4,250.00	To install a height restriction barrier and 2 pedestrian gates in the grounds of Hunstanton Community Centre. The height restriction barrier off Avenue Road is required to; a) deter larger vehicles / caravans / motorhomes from entering the CC grounds and parking without authorisation b) improve traffic flow through entrance c) aid pedestrian safety The replacement gate off Sandringham Road is required to; a) address health & safety issues to members of the public caused by up-growing tree roots b) enable ease of access for pushchairs / wheelchairs / disability scooters c) prevent children and dogs from running off as the replacement gate will be fixed (currently their is just a gap in the fence) The new gate to be erected off Sandringham Road (approx. position opposite United Services Club) is required to; a) allow easier access to Community Centre grounds for residents residing the top end of Sandringham Road and surrounding area	The height restriction barrier will be wider than the current gate fixture, allowing an easier drive in for those attending a class/group at the Centre (Avenue Road is a relatively narrow road and turning in to car park is currently quite tight). Venue hirers are reporting unauthorised cars that are parking in the car park are making it difficult for their members to park for their class/group. The closing gates will prevent children and dogs from running off, re-assuring parents of their children's safety. The gate off Sandringham Road will enable those with a disability, elderly or who have difficulty walking easy access to the field from that end of the town.
15	Local	Grimston Cricket Club	Pavilion Refurbishment	£9,016.00	£2,749.00	30%	15/20	Multiple Parish Use - National Lottery Funding & Club Funds	Approval Leisure/Community Facility	£9,016.00	Grimston Cricket Club is a small rural cricket club in a Level 3 Deprivation area. We provide essential access to sports and outdoor recreational space to the surrounding towns and villages, however our pavilion is in need of refurbishment, as it is in a poor state of repair. We are passionate that the pavilion should be utilised as a community asset for charity events (cake sales, coffee mornings, park runs etc), and is ideally situated in the heart of the villages of Grimston, Pott Row, Roydon and Congham; however in it's current state it is not suitable for use by the community (and is barely fit for purpose for the cricket team!). We have identified five projects as being crucial to refreshing the pavilion and allowing it to be used as a community asset - these are as follows: 1. Re-roofing (club to pay) 2. New Kitchen (funding secured) 3. New Flooring 4. New Toilet/Washing facilities 5. Double Glazed windows	Our double glazing funding - cost £6570.00 - is of particular significance. Our current windows do not open (they are single pane glass type), and as such we are concerned that we may not be able to use the pavilion at all, depending on Covid restrictions. As it stands, we are not able to sufficiently ventilate the changing rooms, and players have had to get changed in their cars, which causes embarrassment to us a club and also to the players of visiting teams. Irrespective of this - we cannot allow the public to use our facilities either with insufficient safe ventilation - whilst we could manage with the current lavatory and flooring (although these are also in need of significant refurbishment) - the lack of ventilation means we are not able to offer any community events at all. If CIL were not wishing to fund anything else, the double glazing is of significance.
13	Local	Hockwold Cricket Club	Hockwold Cricket Club Improvements	£9,238.00	£3,012.00	33%	16/20	Parish & Ward Cllr support Funding from Club & Norfolk Community Foundation	Approval Leisure/Community Facility	£9,238.00	Hockwold Cricket Club was founded in 1906 and now plays in various senior and junior leagues in Norfolk. The club is accredited to the English Cricket Board through its affiliation to the Norfolk Cricket Board. The project is to provide the following: A Secure Scoreboard - £8,000. The current scoreboard has past its useful life and now requires replacement in time for the new season. A New Scorebox - £5,500. The standard the club operates at means that it is important to provide a separate, secure area for the scorers from spectators. This also has a dual role as the junior section has expanded meaning we can put shelves in to secure the additional equipment we need. A Water Collector - £750. We have had wicket covers but the rest of the square remains too wet. If we put flat sheets on the other areas then they hold water and water goes under covers when we brush it off. The collector is a foam drum on wheels which is mobile and absorbs the water from the sheets. Total - £12,250	We offer coaching and competitive cricket for juniors through to senior teams. We ensure access to affordable, valuable outdoor physical activity for all ages and abilities. This is particularly important in a rural community such as ours where there is very limited public transport to main towns and parents/carers who would struggle with work/other family commitments to transport children to activities outside of the village. These proposed works will enable the club to continue to develop and increase our membership at all age levels. We know from the increasing demand we are seeing that local young people want to play cricket and also experience competitive cricket. We are reaching more children and young people through our cricket programmes including holiday and after school programmes, winter training, increasing partnerships with local schools and youth groups and being able to offer a progression route through competitive youth cricket to adult cricket.
17	Local	Hunstanton Town Council	Outdoor Exercise Equipment	£9,000.00	£14,000.00	156%	20/20	Community Groups, Visitors, Community Feedback, Community Clubs support	Approval Leisure/Community Facility	£9,000.00	To provide 'Outdoor Exercise Equipment for Adults/Teens within the grounds of Hunstanton Community Centre, Avenue Road, Hunstanton. To encourage adults/teens to use the outdoor exercise equipment at the Centre.	In a perfect world, everyone would be able to afford to go to a gym, outdoor exercise equipment makes this possible, allowing an equal opportunity for all to get in shape. Exercising improves mental health. Outdoor fitness equipment doesn't just help people get stronger bodies, it also stimulates hormones in the brain that promote better moods. Older adults sometimes find it hard to meet other people, and giving neighbours a chance to chat improves the safety of your community. Working out side by side gives people a chance to talk, helping to create a tighter knit community that cares about each other. Everyone in our community should have the opportunity to enjoy better health, happiness and more friendships, and an outdoor gym gives them a place to make all of those things happen. Advertising the attraction could also help bring more visitors to the area. With more visitors, local businesses will also flourish, which is great for Hunstanton's economy.
