TREASURY MANAGEMENT STRATEGY STATEMENT, MINIMUM REVENUE PROVISION POLICY STATEMENT AND ANNUAL INVESTMENT STRATEGY 2026/2027

Summary

The Council is required to receive and approve a Treasury Management Strategy Statement; Annual Investment Strategy; and Minimum Revenue Provision Policy Statement which covers:

- The Treasury Management Strategy
- Capital plans, including prudential indicators
- A Minimum Revenue Provision (MRP) Policy
- An Investment Strategy

This report covers the requirements of the Local Government Act 2003, the Chartered Institute of Public Finance Accountants (CIPFA) Prudential Code, The Ministry of Housing, Communities and Local Government (MHCLG), MRP Guidance, the CIPFA Treasury Management Code and the MHCLG Investment Guidance.

The Council's Treasury Advisor, MUFG Corporate Markets, provide a template document for the Treasury Management Strategy Statement, which is fully compliant with CIPFA's code and MHCLG's guidance. The Council has used this template in preparing this report.

This report looks at the period 2025-2030, which fits with the Council's Financial Strategy and Capital Programme. Officers of the council have prepared the report based on their views of forecasts for interest rates, and have used information provided by the council's Treasury Management Advisor, MUFG.

Recommendations

Cabinet is asked to recommend that Council approve:

- **The Treasury Management Strategy Statement 2026/2027, including treasury indicators for 2025-2030.**
- **The Minimum Revenue Provision Policy 2026/2027**
- **The Investment Strategy 2026/2027**

Reason for the Decision

The Council must have approved a Treasury Management Strategy Statement, Minimum Revenue Provision Policy Statement and Annual Investment Strategy 2026/2027 by 31 March 2026.

Treasury Management Strategy Statement

Minimum Revenue Provision Policy Statement and Annual Investment Strategy

2026/27

 - 5.4 TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND COUNTERPARTY RISK MANAGEMENT
 - 5.5 APPROVED COUNTRIES FOR INVESTMENTS
 - 5.6 TREASURY MANAGEMENT SCHEME OF DELEGATION
 - 5.7 THE TREASURY MANAGEMENT ROLE OF THE SECTION 151 OFFICER

1.1 Background

The Council is required to operate a balanced revenue budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low-risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning, to ensure that it can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet risk or cost objectives.

The contribution the treasury management function makes to the Council is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

CIPFA defines treasury management as:

"The management of the local Council's borrowing, investments and cash flows, including its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

Whilst any commercial initiatives or loans to third parties will impact on the treasury function, these activities are generally classed as non-treasury activities, (arising usually from capital expenditure), and are separate from the day-to-day treasury management activities.

1.2 Reporting Requirements

1.2.1 Capital Strategy

The CIPFA 2021 Prudential and Treasury Management Codes require all local authorities to prepare a Capital Strategy report which will provide the following: -

- a high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- an overview of how the associated risk is managed
- the implications for future financial sustainability

The aim of the strategy is to ensure that all the Council's elected members fully understand the overall long-term policy objectives and resulting Capital Strategy requirements, governance procedures and risk appetite.

1.2.2 Treasury Management Reporting

The Council is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.

- a. **Prudential and treasury indicators and treasury strategy** (this report) - The first, and most important report is forward looking and covers: -
 - the capital plans, (including prudential indicators)
 - a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time)
 - the Treasury Management Strategy, (how the investments and borrowings are to be organised), including treasury indicators; and
 - an Annual Investment Strategy, (the parameters on how investments are to be managed)
- b. **A mid-year treasury management report** – This is primarily a progress report and will update members on the capital position, amending prudential indicators as necessary, and whether any policies require revision. In addition, this Council will receive quarterly update reports.
- c. **An annual treasury report** – This is a backward-looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

Scrutiny

The above reports are required to be adequately scrutinised before being recommended to the Full Council. This role is undertaken by the Audit Committee.

Quarterly reports – In addition to the three major reports detailed above, since 2023/24 quarterly reporting (end of June/end of December) has also been required. However, these additional reports do not have to be reported to Full Council/Board but do require to be adequately scrutinised. This role is undertaken by the Audit Committee. (The reports, specifically, should comprise updated Treasury/Prudential Indicators.)

1.3 Treasury Management Strategy for 2026/27

The strategy for 2026/27 covers two main areas:

Capital issues

- the capital expenditure plans and the associated prudential indicators
- the minimum revenue provision (MRP) policy

Treasury management issues

- the current treasury position
- treasury indicators which limit the treasury risk and activities of the Council
- prospects for interest rates
- the borrowing strategy
- policy on borrowing in advance of need
- debt rescheduling
- the investment strategy
- creditworthiness policy; and

- the policy on use of external service providers

These elements cover the requirements of the Local Government Act 2003, MHCLG Investment Guidance, MHCLG MRP Guidance, the CIPFA Prudential Code and the CIPFA Treasury Management Code.

1.4 Training

The CIPFA Treasury Management Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny.

Furthermore, pages 47 and 48 of the Code state that they expect “all organisations to have a formal and comprehensive knowledge and skills or training policy for the effective acquisition and retention of treasury management knowledge and skills for those responsible for management, delivery, governance and decision making.

The scale and nature of this will depend on the size and complexity of the organisation’s treasury management needs. Organisations should consider how to assess whether treasury management staff and board/ council members have the required knowledge and skills to undertake their roles and whether they have been able to maintain those skills and keep them up to date.

As a minimum, authorities should carry out the following to monitor and review knowledge and skills:

- Record attendance at training and ensure action is taken where poor attendance is identified.
- Prepare tailored learning plans for treasury management officers and board/council members.
- Require treasury management officers and board/council members to undertake self-assessment against the required competencies (as set out in the schedule that may be adopted by the organisation).
- Have regular communication with officers and board/council members, encouraging them to highlight training needs on an ongoing basis.”

In further support of the revised training requirements, CIPFA’s Better Governance Forum and Treasury Management Network have produced a ‘self-assessment by members responsible for the scrutiny of treasury management’, which is available from the CIPFA website to download.

The Programme of Training for Council and Sub-committee Members for 2025/2026 and 2026/2027 includes training specific to budget setting and treasury management.

The training needs of Council’s treasury management officers are periodically reviewed, and with full support being given for officers to attend workshops, courses and conferences to ensure continuous professional development.

Training records are maintained by officers central to the Treasury function. Similarly, a formal record of the treasury management/capital finance training provided to members is maintained by the Finance Management Team.

1.5 Treasury Management Consultants

The Council uses MUFG Corporate Markets as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon the services of our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, our treasury advisers.

It also recognises that there is value in employing external providers of treasury management services to acquire access to specialist skills and resources.

2. THE CAPITAL PRUDENTIAL INDICATORS 2025/26 – 2029/30

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans are prudent, affordable and sustainable.

2.1 Capital Expenditure and Financing

This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts: -

Capital	2025/2026	2026/2027	2027/2028	2028/2029	2029/2030
	£	£	£	£	£
Tier 1: Major Projects	33,876,940	45,435,420	12,294,880	7,265,430	304,910
Tier 2: Operational Schemes	5,853,970	5,653,000	3,231,750	3,425,280	3,064,150
Subtotal	39,730,910	51,088,420	15,526,630	10,690,710	3,369,060
Tier 3: Pipeline Schemes	566,980	4,222,510	518,000	0	6,000,000
Tier 3: Pipeline Schemes Exempt	40,000	15,057,030	900,000	0	0
Subtotal	606,980	19,279,540	1,418,000	0	6,000,000
Total Including Exempt	40,337,890	70,367,960	16,944,630	10,690,710	9,369,060

Other long-term liabilities - the above financing need excludes other long-term liabilities, leasing arrangements that already include borrowing instruments.

The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

Financing Capital Expenditure	2025/2026 £	2026/2027 £	2027/2028 £	2028/2029 £	2029/2030 £
Capital Receipts	22,425,750	23,895,060	2,523,060	0	0
Capital Grants	10,546,685	16,534,665	5,437,445	2,216,445	2,216,445
Capital Receipts Reserves	1,442,381	1,871,585	486,055	401,055	351,055
Reserves/Revenue Contributions	2,301,074	4,068,390	267,500	12,500	11,650
Unsupported Borrowing	1,892,000	3,312,730	779,750	795,280	6,485,000
Total	38,607,890	49,682,430	9,493,810	3,425,280	9,064,150
CFR Reduced/(Increased) by	(1,730,000)	(19,067,530)	(7,450,820)	(7,265,430)	(304,910)
Net financing need for the year	1,730,000	19,067,530	7,450,820	7,265,430	304,910

2.2 The Council's Borrowing Need (the Capital Financing Requirement)

The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's indebtedness and so its underlying borrowing need. Any capital expenditure above, which

has not immediately been paid for through a revenue or capital resource, will increase the CFR.

The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

The CFR includes any other long-term liabilities (e.g., PFI schemes, finance leases). Whilst these increase the CFR, and therefore the Council's borrowing requirement, these types of schemes include a borrowing facility by the PFI, PPP lease provider and so the Council is not required to separately borrow for these schemes.

The Council is asked to approve the CFR projections below:

Capital Financing Requirement (CFR)	2025/2026 Estimate £ '000	2026/2027 Estimate £ '000	2027/2028 Estimate £ '000	2028/2029 Estimate £ '000	2029/2030 Estimate £ '000
Opening CFR	77,226	77,772	95,502	101,350	106,591
Additional CFR Expenditure	1,730	19,068	7,451	7,265	305
Net Financing Need Total	78,956	96,840	102,953	108,615	106,896
Less MRP and other financing movements	(1,184)	(1,337)	(1,603)	(2,024)	(2,451)
Closing CFR	77,772	95,502	101,350	106,591	104,445
Movement in CFR	546	17,730	5,847	5,242	(2,146)

2.3 Liability Benchmark

The Council is required to estimate and measure the Liability Benchmark (LB) for the forthcoming financial year and the following two financial years, as a minimum.

There are four components to the LB: -

1. **Existing loan debt outstanding:** the Council's existing loans that are still outstanding in future years.
2. **Loans CFR:** this is calculated in accordance with the loans CFR definition in the Prudential Code and projected into the future based on approved prudential borrowing and planned MRP.
3. **Net loans requirement:** this will show the Council's gross loan debt less treasury management investments at the last financial year-end, projected into the future and based on its approved prudential borrowing, planned MRP and any other major cash flows forecast.
4. **Liability benchmark** (or gross loans requirement): this equals net loans requirement plus short-term liquidity allowance.

2.4 Core Funds and Expected Investment Balances

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year-end balances for each resource and anticipated day-to-day cash flow balances.

Year End Resources	2025/2026 Estimate £ '000	2026/2027 Estimate £ '000	2027/2028 Estimate £ '000	2028/2029 Estimate £ '000	2029/2030 Estimate £ '000
General fund balances / ear marked reserves	(38,546)	(42,739)	(39,254)	(34,170)	(29,407)
Capital receipts	(10,547)	(16,535)	(5,437)	(2,216)	(2,216)
Provisions (Collection Fund)	(1,479)	(1,479)	(1,479)	(1,479)	(1,479)
Total core funds	(50,572)	(60,753)	(46,170)	(37,865)	(33,102)
Working capital	(7,576)	(7,576)	(7,576)	(7,576)	(7,576)
Internal Borrowing*	77,772	95,502	101,350	106,591	104,445
Expected external borrowings	19,625	27,174	47,603	61,150	63,767

*Working capital balances shown are estimated year-end; these may be higher mid-year

2.5 Minimum Revenue Provision (MRP) Policy Statement

Under Regulation 27 of the Local Authorities (Capital Finance and Accounting) (England) Regulations 2003, where the Council has financed capital expenditure by borrowing it is required to make a provision each year through a revenue charge (MRP). The 2003 Regulations have been further amended with full effect from April 2025 to expressly provide that in determining a prudent provision local authorities cannot exclude any amount of CFR from its calculation, unless by an exception set out in statute.

The Council is required to calculate a prudent provision of MRP which ensures that the outstanding debt liability is repaid over a period that is reasonably commensurate with that over which the capital expenditure provides benefits. The MRP Guidance (2024) provides four ready-made options for calculating MRP. The Council can use a mix of these options if it considers it appropriate to do so.

Regulation 27(3) allows a local Council to charge MRP in the financial year following the one in which capital expenditure finance by debt was incurred.

Capital expenditure financed by borrowing in 2025/26 will not be subject to an MRP charge until 2026/27, or in the financial year following the one which the asset first becomes available for use.

The Council will apply the asset life method for any expenditure capitalised under a Capitalisation Direction.

2.6 Leases

1. International Financial Reporting Standard (IFRS) 16

The adoption of IFRS 16 has introduced a single lessee accounting model which requires the recognition of assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. This policy outlines the approach of the Council regarding the recognition and management of lease contracts in compliance with IFRS 16.

2. Scope

This policy applies to all lease contracts entered into by the Council with a term of more than 12 months. Leases for low-value assets are excluded from this policy.

3. Recognition of Leases

The Council will recognise right-of-use assets and corresponding lease liabilities for all qualifying lease contracts on the balance sheet. This recognition will result in an increase in the Council's long-term liabilities and debt liability.

4. Retrospective Accounting

Generally accepted accounting practice requires changes introduced by IFRS 16 to be accounted for retrospectively. Consequently, an element of the rental or service charge payable in previous years (and previously charged to revenue accounts) will be taken to the balance sheet to reduce the liability. This change will result in a one-off increase to the Capital Financing Requirement (CFR) and an equal increase in revenue account balances.

5. Minimum Revenue Provision (MRP)

To ensure prudent financial management, the guidance recommends including in the annual MRP charge an amount equal to the amount taken to the balance sheet to reduce the liability, including the retrospective element in the first year. This approach aims to place the Council in the same position as if the change had not occurred.

6. Alternative Approaches

Local authorities may consider alternative approaches to the calculation of MRP, subject to compliance with the overriding statutory requirement to make a prudent level of MRP. The Council will review and adopt the most appropriate method that aligns with its financial strategy.

7. MRP for Right-of-Use Assets

Regarding MRP in respect of assets acquired under leases where a right-of-use asset is on the balance sheet, the prudent charge to revenue shall be measured as an amount equal to the element of the rent/charge that goes to write down the balance sheet liability.

8. Off-Balance Sheet Leases

Where a lease (or part of a lease) has previously been accounted for off-balance sheet, the MRP requirement will be considered met by the inclusion in the charge for the year in which the restatement occurs, of an amount equal to the write-down for that year plus the retrospective writing down of the balance sheet liability arising from the restatement.

9. Monitoring and Compliance

The Council will regularly monitor and review its lease agreements to ensure compliance with IFRS 16 and this policy. Any significant changes or adjustments will be reported and addressed promptly.

2.7 Capital loans

The Council has issued capital loans that are categorised as non-commercial and has chosen to apply/not apply MRP on the following basis:

- Non-Commercial Loans: Loans issued for capital projects that align with the Council's strategic objectives and do not primarily aim for financial return.
- Commercial Loans: Loans issued for purposes that would generate financial return if undertaken by the Council itself.

The Council will regularly monitor and review the status of all capital loans to ensure compliance with this policy and relevant regulations. Any changes in the classification of loans will be promptly addressed.

The Treasury Management Strategy and Capital Strategy will be updated annually to reflect the Council's approach to capital loans and ensure alignment with legislative requirements and good practices.

2.8 Capital receipts

For capital expenditure on loans to third parties where the principal element of the loan has been repaid in annual instalments, the capital receipts arising from the principal loan repayments will be used to reduce the CFR instead of MRP.

Where no principal repayment is made in a given year, MRP will be charged as follows:

2.9 MRP Overpayments

Under the MRP guidance, charges made in excess of the statutory MRP can be made and are known as voluntary revenue provision (VRP).

VRP can be reclaimed in later years if deemed necessary or prudent. In order for these amounts to be reclaimed for use in the budget, this policy must disclose the cumulative overpayment made each year.

3. BORROWING

The capital expenditure plans set out in Section 2 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Council's Capital Strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions, and the Annual Investment Strategy.

3.1 Current Portfolio Position

The overall treasury management portfolio as at 31.3.25 and for the position as at 31.12.25 are shown below for both borrowing and investments.

		actual 31.3.25	actual 31.3.25	current 31.12.25	current 31.12.25
Treasury investments		£000	%	£000	%
Banks		0	0%	7,430	55%
Building societies - unrated		0	0%	0	0%
Building societies - rated		0	0%	0	0%
Local authorities		4,000	24%	0	0%
DMADF (H.M.Treasury)		0	0%	0	0%
Money Market Funds		13,015	76%	6,040	45%
Certificates of Deposit		0	0%	0	0%
Total managed in house		17,015	100%	13,470	100%
Bond Funds		0	0%	0	0%
Property Funds		0	0%	0	0%
Total managed externally		0	0%	0	0%
Total treasury investments		17,015	100%	13,470	100%
Treasury external borrowing					
Local Authorities		8,500	22%	5,000	14%
PWLB		20,000	52%	20,000	57%
Barclays		10,000	26%	10,000	29%
Total external borrowing		38,500	100%	35,000	100%
Net treasury investments / (borrowing)		-21,485	0	-21,530	0

The Council's forward projections for borrowing are summarised below. The table shows the actual external debt, against the underlying capital borrowing need, (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

Year End Resources	2025/2026 Estimate £ '000	2026/2027 Estimate £ '000	2027/2028 Estimate £ '000	2028/2029 Estimate £ '000	2029/2030 Estimate £ '000
External Debt					
Debt at 1 April	28,602	30,332	49,400	56,850	64,116
Expected change in Debt	1,730	19,068	7,451	7,265	305
Actual gross debt at 31 March	30,332	49,400	56,850	64,116	64,421
The Capital Financing Requirement (Cumulative)	77,772	95,502	101,350	106,591	104,445
BORROWING	47,440	46,103	44,499	42,476	40,025

Within the range of prudential indicators there are several key indicators to ensure that the Council operates its activities within well-defined limits. One of these is that the Council needs to ensure that its gross debt does not, except in the short-term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2026/27 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

The Assistant Director Resources reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes account of current commitments, existing plans and the proposals in this budget report.

3.2 Treasury Indicators: Limits to Borrowing Activity

The Operational Boundary. This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

Operational boundary	2025/2026 Estimate £ '000	2026/2027 Estimate £ '000	2027/2028 Estimate £ '000	2028/2029 Estimate £ '000	2029/2030 Estimate £ '000
Debt	83,000	101,000	107,000	112,000	110,000
Other long term liabilities	1,000	1,000	1,000	1,000	1,000
Total	84,000	102,000	108,000	113,000	111,000

The Authorised Limit for external debt. This is a key prudential indicator and represents a control on the maximum level of borrowing. This represents a legal limit beyond which external debt is prohibited, and this limit needs to be set or revised by the Full Council. It reflects the level of external debt which, while not desired, could be afforded in the short-term, but is not sustainable in the longer-term.

- This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all local Council plans, or those of a specific Council, although this power has not yet been exercised.
- The Council is asked to approve the following Authorised Limit

Authorised Limit	2025/2026 Estimate £ '000	2026/2027 Estimate £ '000	2027/2028 Estimate £ '000	2028/2029 Estimate £ '000	2029/2030 Estimate £ '000
Debt	93,000	111,000	117,000	122,000	120,000
Other long term liabilities	1,000	1,000	1,000	1,000	1,000
Total	94,000	112,000	118,000	123,000	121,000

3.3 Prospects for Interest Rates

The Council has appointed MUFG Corporate Markets as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. MUFG Corporate Markets provided the following forecasts on 22 December 2025. These are forecasts for Bank Rate, average earnings and PWLB certainty rates, gilt yields plus 80 bps.

MUFG Corporate Markets Interest Rate View 22.12.25													
	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28	Jun-28	Sep-28	Dec-28	Mar-29
BANK RATE	3.75	3.50	3.50	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25
3 month ave earnings	3.80	3.50	3.50	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30
6 month ave earnings	3.80	3.50	3.50	3.40	3.30	3.30	3.30	3.40	3.40	3.40	3.40	3.40	3.40
12 month ave earnings	3.90	3.60	3.60	3.50	3.40	3.50	3.50	3.50	3.50	3.50	3.60	3.60	3.60
5 yr PWLB	4.60	4.50	4.30	4.20	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10
10 yr PWLB	5.20	5.00	4.90	4.80	4.80	4.70	4.70	4.70	4.70	4.60	4.60	4.60	4.70
25 yr PWLB	5.80	5.70	5.60	5.50	5.50	5.40	5.30	5.30	5.30	5.20	5.20	5.20	5.20
50 yr PWLB	5.60	5.50	5.40	5.30	5.30	5.20	5.10	5.10	5.10	5.00	5.10	5.00	5.00

Additional notes by MUFG Corporate Markets on this forecast table: -

- Our last interest rate forecast update was undertaken on 11 August 2025. Since then, a combination of tepid growth (0.2% q/q GDP for Q2 and 0.1% q/q GDP for Q3), falling inflation (currently CPI is 3.2%), and a November Budget that will place more pressure on the majority of households' income, has provided an opportunity for the Bank of England's Monetary Policy Committee to further reduce Bank Rate from 4% to 3.75% on 18 December 2025.
- Surprisingly, to most market commentators, the recent steep fall in CPI inflation in one month from 3.6% to 3.2% did not persuade most "dissenters" from the November vote (Lombardelli, Greene, Mann and Pill) to switch to the rate-cutting side of the Committee. Instead, it was left to Bank Governor, Andrew Bailey, to use his deciding vote to force a rate cut through by the slimmest of margins, 5-4.
- Given the wafer-thin majority for a rate cut it was not unexpected to hear that although rates would continue on a "gradual downward path", suggesting a further rate cut or cuts in the offing, MPC members want to assess incoming evidence on labour market activity and wage growth. Indeed, with annual wage growth still over 4.5%, the MPC reiterated that the case for further rate cuts would be "a closer call", and Governor Bailey observed there is "limited space as Bank Rate approaches a neutral level".
- Accordingly, the MUFG Corporate Markets forecast has been revised to price in a rate cut in Q2 2026 to 3.5%, likely to take place in the wake of a significant fall in the CPI inflation reading from 3% in March to 2% in April (as forecast by Capital Economics), followed by a short lull through the summer whilst more data is garnered, and then a further rate cut to 3.25% in Q4.
- As in August, nonetheless, threats to that central scenario abound. What if wage increases remain stubbornly high? There are, after all, several sectors of the domestic economy, including social care provision and the building/construction industries, where staff shortages remain severe. Moreover, by May 2026, following the local elections, we will have a better handle on whether or not the Starmer/Reeves team is going to see out the current Parliament or whether they face a Leadership challenge from within their own party. If so, how will gilt markets react to these variables...and will there be additional geo-political factors to also bake in, particularly the Fed's monetary policy decisions in 2026 and the ongoing battle to lower rates whilst inflation remains close to 3%.

- Accordingly, our updated central forecast is made with several hefty caveats. We are confident, as we have been for some time, that our forecast for Bank Rate and the 5-year PWLB Certainty Rate is robust, and we have marginally brought forward the timing of the next rate cut(s). But for the 10-, 25- and 50-years part of the curve, the level of gilt issuance, and the timing of its placement, will be integral to achieving a benign trading environment. That is not a “given”, and additionally, the inflation outlook and political factors domestically and, crucially, in the US, are also likely to hold sway. Matters should be clearer by June in the UK, but the US mid-term elections are scheduled for November.
- Our revised PWLB rate forecasts are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012. Please note, the lower Housing Revenue Account (HRA) PWLB rate started on 15 June 2023 for those authorities with an HRA (standard rate minus 60 bps) and is set to prevail until at least the end of March 2026. Hopefully, there will be a further extension to this discounted rate announced in January.
- Money market yield forecasts are based on expected average earnings by local authorities for 3 to 12 months.

Gilt yields and PWLB rates

The overall longer-run trend is for gilt yields and PWLB rates to fall back over the timeline of our forecasts, but the risks to our forecasts are to the upsides. Our target borrowing rates are set **two years forward** (as we expect rates to fall back) and the current PWLB (certainty) borrowing rates are set out below: -

PWLB borrowing	Current borrowing rates as at 22.12.25 p.m.	Target borrowing rate now (end of Q4 2027)	Target borrowing rate previous (end of Q4 2027)
	%	%	%
5 years	4.81	4.10	4.20
10 years	5.39	4.70	4.70
25 years	6.01	5.30	5.30
50 years	5.78	5.10	5.10

Borrowing advice: Our long-term (beyond 10 years) forecast for the neutral level of Bank Rate remains at 3.5%. As all PWLB certainty rates are still above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can be obtained at the shorter end of the curve (<5 years PWLB maturity/<10 years PWLB EIP) and short-dated fixed LA to LA monies should also be considered. Temporary borrowing rates will, generally, fall in line with Bank Rate cuts.

Our suggested **budgeted earnings rates for investments** up to about three months' duration in each financial year are set out below.

Average earnings in each year	Now	Previously
	%	%
2025/26 (residual)	3.80	3.90
2026/27	3.40	3.60
2027/28	3.30	3.30
2028/29	3.30	3.50
2029/30	3.50	3.50
Years 6-10	3.50	3.50
Years 10+	3.50	3.50

We will continue to monitor economic and market developments as they unfold. Typically, we formally review our forecasts following the quarterly release of the Bank of England's Monetary Policy Report but will consider our position on an ad hoc basis as required.

Our interest rate forecast for Bank Rate is in steps of 25 bps, whereas PWLB forecasts have been rounded to the nearest 10 bps and are central forecasts within bands of + / - 25 bps. Naturally, we continue to monitor events and will update our forecasts as and when appropriate.

3.4 Borrowing Strategy

The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need, (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as medium and longer dated borrowing rates are expected to fall from their current levels, albeit only once prevailing inflation concerns are addressed by restrictive near-term monetary policy. That is, Bank Rate remains relatively elevated in 2026 even if some rate cuts arise.

Against this background and the risks within the economic forecast, caution will be adopted with the 2026/27 treasury operations. The Assistant Director - Finance will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

- *if it was felt that there was a significant risk of a sharp RISE in borrowing rates, then borrowing will be postponed.*
- *if it was felt that there was a significant risk of a much sharper FALL in borrowing rates than that currently forecast, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.*

Any decisions will be reported to the appropriate decision-making body at the next available opportunity.

3.5 Policy on Borrowing in Advance of Need

The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

3.6 Rescheduling

Rescheduling of current borrowing in our debt portfolio may be considered whilst premature redemption rates remain elevated but only if there is surplus cash available to facilitate any repayment, or rebalancing of the portfolio to provide more certainty is considered appropriate.

If rescheduling is to be undertaken, it will be reported to the *Audit Committee*, at the earliest meeting following its action.

3.7 New Financial Institutions as a Source of Borrowing

Currently the PWLB Certainty Rate is set at gilts + 80 basis points. However, consideration may still need to be given to sourcing funding from the following sources for the following reasons:

- Local authorities (primarily shorter dated maturities out to 3 years or so – generally still cheaper than the Certainty Rate).
- Financial institutions (primarily insurance companies and pension funds but also some banks, out of forward dates where the objective is to avoid a “cost of carry” or to achieve refinancing certainty over the next few years).

Our advisors will keep us informed as to the relative merits of each of these alternative funding sources.

3.8 Approved Sources of Long and Short-term Borrowing

On Balance Sheet	Fixed	Variable
PWLB	●	●
UK Municipal Bond Agency	●	●

Finance Leases	•	•

4 ANNUAL INVESTMENT STRATEGY

4.1 Investment Policy – Management of Risk

The Ministry of Housing, Communities and Local Government (MHCLG) and CIPFA have extended the meaning of 'investments' to include both financial and non-financial investments. This report deals solely with treasury (financial) investments, (as managed by the treasury management team). Non-financial investments, essentially the purchase of income yielding assets and service investments, are covered in the Capital Strategy, (a separate report).

Risk Management Framework

Our investment policy is designed to manage risk effectively and ensure the safety of the Council's capital. The primary objectives of our treasury investment strategy are:

Security: Ensuring the safety of the capital invested.

Liquidity: Maintaining the necessary liquidity to meet anticipated expenditure.

Yield: Achieving a return commensurate with the level of risk.

In pursuing these objectives, we prioritize security and liquidity over yield. This means that we will only seek to achieve an optimal return once the security and liquidity criteria are satisfied.

The Council's investment policy has regard to the following: -

- MHCLG's Guidance on Local Government Investments ("the Guidance")
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 ("the Code")
- CIPFA Treasury Management Guidance Notes 2021

The Council's investment priorities will be security first, portfolio liquidity second and then yield (return). The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and with regard to the Council's risk appetite.

In the current economic climate, it is considered appropriate to maintain a degree of liquidity to cover cash flow needs but to also consider "laddering" investments for periods up to 12 months with high credit rated financial institutions, whilst investment rates remain elevated, as well as wider range fund options.

The above guidance from MHCLG and CIPFA places a high priority on the management of risk. This Council has adopted a prudent approach to managing risk and defines its risk appetite by the following means: -

1. Minimum acceptable **credit criteria** are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short-term and long-term ratings.
2. **Other information:** ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that

reflects the opinion of the markets. To achieve this consideration the Council will engage with its advisors to maintain a monitor on market pricing such as “**credit default swaps**” and overlay that information on top of the credit ratings.

3. **Other information sources** used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.
4. This Council has defined the list of **types of investment instruments** that the treasury management team are authorised to use. There are two lists in Appendix 5.4 under the categories of ‘specified’ and ‘non-specified’ investments.

Specified investments are those with a high level of credit quality and subject to a maturity limit of one year or have less than a year left to run to maturity, if originally, they were classified as being non-specified investments solely due to the maturity period exceeding one year.

Non-specified investments are those with less high credit quality, may be for periods in excess of one year, and/or are more complex instruments which require greater consideration by members and officers before being authorised for use.

5. **Non-specified and loan investment limits.** The Council has determined that it will set a limit to the maximum exposure of the total treasury management investment portfolio to non-specified treasury management investments as being £4 million of the total investment portfolio.
6. **Lending limits**, (amounts and maturity), for each counterparty will be set through applying the matrix table in paragraph 4.2.
7. **Transaction limits** are set for each type of investment in 4.2.
8. This Council will set a limit for its investments which are invested for **longer than 365 days**, (see paragraph 4.4).
9. Investments will only be placed with counterparties from countries with a specified minimum **sovereign rating**, (see paragraph 4.3).
10. This Council has engaged **external consultants**, (see paragraph 1.5), to provide expert advice on how to optimise an appropriate balance of security, liquidity and yield, given the risk appetite of this Council in the context of the expected level of cash balances and need for liquidity throughout the year.
11. All investments will be denominated in **sterling**.
12. As a result of the change in accounting standards under IFRS 9, this Authority will consider the implications of investment instruments which could result in an adverse movement in the value of the amount invested and resultant charges at the end of the year to the General Fund. (In November 2018, the MHCLG, concluded a consultation for a temporary override to allow English local authorities time to adjust their portfolio of pooled investments by announcing a statutory override to delay implementation of IFRS 9 for five years ending 31.3.23. Subsequently, a further extension to the override to **31.3.29** was agreed by Government but only for those pooled investments made before 1st April 2024

The Council recognises that the extension of the statutory override provides additional time to align its investment portfolio with the new accounting standards, ensuring compliance while minimising financial impact. The Council will conduct thorough assessments of the potential risks associated with adverse movements in investment values and adopt strategies to mitigate these risks.

However, this Council will also pursue **value for money** in treasury management and will monitor the yield from investment income against appropriate benchmarks for investment performance, (see paragraph 4.5). Regular monitoring of investment performance will be carried out during the year.

Changes in risk management policy from last year.

The above criteria are *unchanged* from last year.

4.2 Creditworthiness Policy

This Council applies the creditworthiness service provided by the MUFG Corporate Markets. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies - Fitch, Moody's and Standard & Poor's. The credit ratings of counterparties are supplemented with the following overlays: -

1. "watches" and "outlooks" from credit rating agencies;
2. CDS spreads that may give early warning of changes in credit ratings;
3. sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, and any assigned Watches and Outlooks, in a weighted scoring system which is then combined with an overlay of CDS spreads. The end-product of this is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the suggested duration for investments. The Council will, therefore, use counterparties within the following durational bands:

- Yellow 5 years *
- Dark pink 5 years for Ultra-Short Dated Bond Funds with a credit score of 1.25
- Light pink 5 years for Ultra-Short Dated Bond Funds with a credit score of 1.5
- Purple 2 years
- Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
- Orange 1 year
- Red 6 months
- Green 100 days
- No colour not to be used

The MUFG Corporate Markets creditworthiness service uses a wider array of information other than just primary ratings. Furthermore, by using a risk weighted scoring system, it does not give undue preponderance to just one agency's ratings.

Typically, the minimum credit ratings criteria the Council uses will be a short-term rating (Fitch or equivalents) of F1 and a long-term rating of A-. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances, consideration will be given to the whole range of ratings available, or other topical market information, to support their use.

All credit ratings will be monitored monthly. The Council is alerted to changes to ratings of all three agencies through its use of the MUFG Corporate Markets creditworthiness service.

- if a downgrade results in the counterparty / investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- in addition to the use of credit ratings the Council will be advised of information in movements in Credit Default Swap spreads against the iTraxx European Senior Financials benchmark and other market data on a daily basis via its Passport website, provided exclusively to it by MUFG Corporate Markets. Extreme market movements may result in the downgrade of an institution or removal from the Council's lending list.

Sole reliance will not be placed on the use of this external service. In addition, this Council will also use market data and market information, as well as information on any external support for banks to help its decision-making process.

Y	Pi1	Pi2	P	B	0	R	G	N/C
1	1.25	1.5	2	3	4	5	6	7
Up to 5yrs	Up to 5yrs	Up to 5yrs	Up to 2yrs	Up to 1yr	Up to 1yr	Up to 6mths	Up to 100days	No Colour

Banks *	yellow		£2m		5yrs			
Banks	purple		£4m		2 yrs			
Banks	orange		£4m		1 yr			
Banks – part nationalised	blue		£4m		1yr			
Banks	red		£4m		6 mths			
Banks	green		£4m		100 days			
Banks	No colour		Not to be used					
DMADF (Debt Management Account Deposit Facility)	UK sovereign rating		Unlimited		6 months			
Local authorities	yellow		£10m		Unlimited			
Local Authorities Companies which are 100% owned by the Borough Council King's Lynn and West Norfolk	N/A		£12m		Unlimited			
	Fund rating		Money and/or % Limit		Time Limit			
Money Market Funds CNAV	AAA		£4m		liquid			
Money Market Funds LVNAV	AAA		£4m		liquid			

Money Market Funds VNAV	AAA	£4m	liquid
Ultra-Short Dated Bond Funds with a credit score of 1.25	Dark pink / AAA	£3m	liquid
Ultra-Short Dated Bond Funds with a credit score of 1.50	Light pink / AAA	£3m	liquid

* Please note: the yellow colour category is for UK Government debt, or its equivalent, money market funds and collateralised deposits where the collateral is UK Government debt – see appendix 5.4.

** Please note: “fund” ratings are different to individual counterparty ratings, coming under either specific “MMF” or “Bond Fund” rating criteria.

Creditworthiness.

Significant levels of downgrades to Short and Long-Term credit ratings have not materialised since the crisis in March 2020. In the main, where they did change, any alterations were limited to Outlooks. Nonetheless, when setting minimum sovereign debt ratings, this Council will not set a minimum rating for the UK

The Council's creditworthiness policy stipulates a minimum credit rating threshold for counterparties. Investments are only made with institutions that meet or exceed this threshold. Regular monitoring of ratings and market intelligence ensures that any changes in the creditworthiness of our counterparties are swiftly addressed. In cases where a counterparty's credit rating falls below the minimum acceptable level, we take immediate action to withdraw or reduce our investments with them.

This comprehensive creditworthiness framework ensures that our investment decisions are informed, prudent, and aligned with our primary objective of capital preservation.

Credit Default Swap (CDS) prices

Although bank CDS prices, (these are market indicators of credit risk), spiked upwards during the days of the Truss/Kwarteng government in the autumn of 2022, they have returned to more average levels since then. However, sentiment can easily shift, so it will remain important to undertake continual monitoring of all aspects of risk and return in the current circumstances. MUFG Corporate Markets monitor CDS prices as part of their creditworthiness service to local authorities and the Council has access to this information via its MUFG Corporate Markets-provided Passport portal.

Limits

Due care will be taken to consider the exposure of the Council's total investment portfolio to non-specified investments, countries, groups and sectors.

- a. **Non-specified treasury management investment limit.** The Council has determined that it will limit the maximum total exposure of treasury management investments to non-specified treasury management investments as being £4m of the total treasury management investment portfolio
- b. **Country limit.** The Council has determined that it will only use approved counterparties from the UK and from countries with a **minimum sovereign credit rating of AA** from Fitch. The list of countries that qualify using this credit criteria as at

the date of this report are shown in Appendix 5.6. This list will be added to, or deducted from, by officers should ratings change in accordance with this policy.

Other limits. In addition: -

- no more than £4m will be placed with any non-UK country at any time;
- limits in place above will apply to a group of companies/institutions;
- sector limits will be monitored regularly for appropriateness.

4.3 Investment Strategy

In-house funds. Investments will be made with reference to the core balance and cashflow requirements and the outlook for short-term interest rates (i.e., rates for investments up to 12 months). Greater returns are usually obtainable by investing for longer periods. The current shape of the yield curve suggests that rates can be expected to fall throughout 2026, but only if the CPI measure of inflation maintains a downwards trend towards the Bank of England's 2% target. Rates may be cut quicker than expected if the economy stagnates.

Accordingly, while most cash balances are required in order to manage the ups and downs of cash flow, where cash sums can be identified that could be invested for longer periods, the value to be obtained from longer-term investments will be carefully assessed.

Investment returns expectations.

The current forecast shown in paragraph 3.3, includes a forecast for Bank Rate to fall to a low of 3.25% in 2026.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year were updated on 22 December 2025 and are as follows: -

<i>Average earnings in each year</i>	<i>Now</i>	<i>Previously</i>
	<i>%</i>	<i>%</i>
2025/26 (residual)	3.80	3.90
2026/27	3.40	3.60
2027/28	3.30	3.30
2028/29	3.30	3.50
2029/30	3.50	3.50
Years 6-10	3.50	3.50

Caution must be exercised in respect of all interest rate forecasts.

Against this view, the Treasury officers expect a cautious approach to interest rate adjustments, taking into account the current economic indicators and market conditions. They remain vigilant and flexible, ready to adapt their strategies should there be any significant changes in the economic landscape.

For its cash flow generated balances, the Council will seek to utilise its business reserve instant access and notice accounts, Money Market Funds and short-dated deposits, (overnight to 100 days), in order to benefit from the compounding of interest.

Changes of investment strategy

The above criteria are unchanged from last year.

Investment treasury indicator and limit - total principal funds invested for greater than 365 days. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment and are based on the availability of funds after each year-end.

The Council is asked to approve the following treasury indicator and limit: -

	Upper limit for principal sums invested for longer than 365 days			
£m	2025/26	2026/27	2027/28	2028/29
Principal sums invested for longer than 365 days	£4m	£4m	£4m	£4m
With Local Authorities	£10m	£10m	£10m	£10m
With Local Council companies which are 100% owned by BCKLWN	£12m	£12m	£12m	£12m
Current investments as at 31/12/2025 in excess of 1 year maturing in each year	n/a	n/a	n/a	n/a

4.4 Investment Performance / Risk Benchmarking

The Council will use an investment benchmark to assess the investment performance of its investment portfolio of overnight, 7 day, 1, 3, 6 or 12 month SONIA.

4.5 End of Year Investment Report

At the end of the financial year, the Council will report on its investment activity as part of its Annual Treasury Report.

4.6 Financial Implications

The financial implications of the borrowing and investment strategy and MRP are reflected in the financing adjustment figure included in the Financial Strategy 2025-2030 to be approved at Council on 26th February 2026

The accounting treatment may differ from the underlying cash transactions arising from investment decisions made by this council. To ensure that the council is protected from any adverse revenue impact, which may arise from these differences, we will review the accounting implications of new transactions before they are undertaken.

4.7 Risk Management Implications

There are elements of risk in dealing with the treasury management function although the production and monitoring of such controls as Prudential Indicators and Treasury Management Strategies help to reduce the exposure of the council to the market. The costs and returns on borrowing and investment are in themselves a reflection of risk that is seen by the market forces. The action and controls outlined in the report will provide for sound financial and performance management procedures.

4.8 Policy Implications

There are no other changes in the Treasury Management policy at present, other than those outlined in this report. Appendices 5.6 and 5.7 detail the treasury management scheme of delegation and the role of the Section 151 Officer.

4.9 Statutory Considerations

The council must set Prudential Indicators and adopt a Treasury Management Strategy and Annual investment Strategy before 31 March 2026.

4.10 Access to Information

Monthly Monitoring reports
The Financial Strategy 2025 - 2030
Capital Programme 2025 - 2030
Council Website – Treasury Management Practices
Capital Strategy 2025/2026

5 APPENDICES

(These can be appended to the report or omitted as required)

1. Prudential and treasury indicators
2. Interest rate forecasts
3. Economic background
4. Treasury management practice – credit and counterparty risk management
5. Approved countries for investments

5.1.2 Affordability Prudential Indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators: -

Ratio of Financing Costs to Net Revenue Stream

This indicator identifies the trend in the cost of capital, (borrowing and other long-term obligation costs), against the net revenue stream.

	2025/2026	2026/2027	2027/2028	2028/2029	2029/2030
%	Estimate	Estimate	Estimate	Estimate	Estimate
Services	5.81%	7.30%	3.90%	5.63%	6.30%
Commercial Services	0.00%	0.00%	0.00%	0.00%	0.00%

The estimates of financing costs include current commitments and the proposals in this budget report.

5.1.3 Maturity Structure of Borrowing

Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large, fixed rate sums falling due for refinancing, and are required for upper and lower limits.

The Council is asked to approve the following treasury indicators and limits: -

£m	2025/2026	2026/2027	2027/2028	2028/2029	2029/2030
Interest rate exposures	Upper	Upper	Upper	Upper	Upper
Limits on fixed interest rates based on net debt	100%	100%	100%	100%	100%
Limits on variable interest rates based on net debt	40%	40%	40%	40%	40%

Maturity structure of fixed interest rate borrowing 2025/26

	Lower	Upper	£m
Under 12 months	0%	100%	25
12 months to 2 years	0%	100%	-
2 years to 50 years	0%	100%	-
50 years +	0%	100%	-

5.1.4. Control of Interest Rate Exposure

Please see paragraphs 3.3, 3.4 and 4.4.

5.3 ECONOMIC BACKGROUND (to 23 December 2025)

- The first half of 2025/26 saw:
- A 0.3% pick up in GDP for the period April to June 2025. More recently, the economy flatlined in July, with higher taxes for businesses restraining growth, but picked up to 0.1% m/m in August before falling back by 0.1% m/m in September.
- The 3m/yy rate of average earnings growth excluding bonuses has fallen from 5.5% to 4.6% in September.
- CPI inflation has ebbed and flowed but finished September at 3.8%, whilst core inflation eased to 3.5%.
- The Bank of England cut interest rates from 4.50% to 4.25% in May, and then to 4% in August (and subsequently to 3.75% in December).
- The 10-year gilt yield fluctuated between 4.4% and 4.8%, ending the half year at 4.70% (before falling back to 4.43% in early November).
- From a GDP perspective, the financial year got off to a bumpy start with the 0.3% m/m fall in real GDP in April as front-running of US tariffs in Q1 (when GDP grew 0.7% on the quarter) weighed on activity. Despite the underlying reasons for the drop, it was still the first fall since October 2024 and the largest fall since October 2023. However, the economy surprised to the upside in May and June so that quarterly growth ended up 0.3% q/q (subsequently revised down to 0.2% q/q). Nonetheless, the 0.0% m/m change in real GDP in July, followed by a 0.1% m/m increase in August and a 0.1% decrease in September will have caused some concern. GDP growth for 2025 - 2028 is currently forecast by the Office for Budget Responsibility to be in the region of 1.5%.
- Sticking with future economic sentiment, the composite Purchasing Manager Index (PMI) for the UK increased to 52.2 in October. The manufacturing PMI output balance improved to just below 50 but it is the services sector (52.2) that continues to drive the economy forward. Nonetheless, the PMIs suggest tepid growth is the best that can be expected in the second half of 2025 and the start of 2026. Indeed, on 13 November we heard that GDP for July to September was only 0.1% q/q.
- Turning to retail sales volumes, and the 1.5% year-on-year rise in September, accelerating from a 0.7% increase in August, marked the highest gain since April. On a monthly basis, retail sales volumes rose 0.5%, defying forecasts of a 0.2% fall, following an upwardly revised 0.6% gain in August. Household spending remains surprisingly resilient, but headwinds are gathering.
- Prior to the November Budget, the public finances position looked weak. The £20.2 billion borrowed in September was slightly above the £20.1 billion forecast by the OBR. For the year to date, the £99.8 billion borrowed is the second highest for the April to September period since records began in 1993, surpassed only by borrowing during the COVID-19 pandemic. The main drivers of the increased borrowing were higher debt interest costs, rising government running costs, and increased inflation-linked benefit payments, which outweighed the rise in tax and National Insurance contributions.
- Following the 26 November Budget, the Office for Budget Responsibility (OBR) calculated the net tightening in fiscal policy as £11.7bn (0.3% of GDP) in 2029/30, smaller than the consensus forecast of £25bn. It did downgrade productivity growth by 0.3%, from 1.3% to 1.0%, but a lot of that influence was offset by upgrades to its near-term wage and inflation forecasts. Accordingly, the OBR judged the Chancellor was

going to achieve her objectives with £4.2bn to spare. The Chancellor then chose to expand that headroom to £21.7bn, up from £9.9bn previously.

- Moreover, the Chancellor also chose to raise spending by a net £11.3bn in 2029/30. To pay for that and the increase in her headroom, she raised taxes by £26.1bn in 2029/30. The biggest revenue-raisers were the freeze in income tax thresholds from 2028/29 (+£7.8bn) and the rise in NICs on salary-sacrifice pension contributions (+£4.8bn). The increase in council tax for properties worth more than £2.0m will generate £0.4bn.
- The weakening in the jobs market looked clear in the spring. May's 109,000 m/m fall in the PAYE measure of employment was the largest decline (barring the pandemic) since the data began and the seventh in as many months. The monthly change was revised lower in five of the previous seven months too, with April's 33,000 fall revised down to a 55,000 drop. More recently, however, the monthly change was revised higher in seven of the previous nine months by a total of 22,000. So instead of falling by 165,000 in total since October, payroll employment is now thought to have declined by a smaller 153,000. Even so, payroll employment has still fallen in nearly all the months since the Chancellor announced the rises in National Insurance Contributions (NICs) for employers and the minimum wage in the October 2024 Budget. The number of job vacancies in the three months to November 2025 stood at 729,000 (the peak was 1.3 million in spring 2022). All this suggests the labour market continues to loosen, albeit at a slow pace.
- A looser labour market is driving softer wage pressures. The 3m/yy rate of average earnings growth excluding bonuses has fallen from 5.5% in April to 4.6% in September (still at that level in November). The rate for the private sector has slipped just below 4% as the year end approaches.
- CPI inflation remained at 3.8% in September but dropped to 3.2% by November. Core inflation also fell to 3.2% by November while services inflation fell to 4.4%. Nonetheless, a further loosening in the labour market and weaker wage growth may be a requisite to UK inflation coming in below 2.0% by 2027.
- An ever-present issue throughout recent months has been the pressure being exerted on medium and longer dated gilt yields. The yield on the 10-year gilt moved sideways in the second quarter of 2025, rising from 4.4% in early April to 4.8% in mid-April following wider global bond market volatility stemming from the "Liberation Day" tariff announcement, and then easing back as trade tensions began to de-escalate. By the end of April, the 10-year gilt yield had returned to 4.4%. In May, concerns about stickier inflation and shifting expectations about the path for interest rates led to another rise, with the 10-year gilt yield fluctuating between 4.6% and 4.75% for most of May. Thereafter, as trade tensions continued to ease and markets increasingly began to price in looser monetary policy, the 10-year yield edged lower, and ended June at 4.50%.
- More recently, the yield on the 10-year gilt rose from 4.46% to 4.60% in early July as rolled-back spending cuts and uncertainty over Chancellor Reeves' future raised fiscal concerns. Although the spike proved short lived, it highlighted the UK's fragile fiscal position. In an era of high debt, high interest rates and low GDP growth, the markets are now more sensitive to fiscal risks than before the pandemic. During August, long-dated gilts underwent a particularly pronounced sell-off, climbing 22 basis points and

reaching a 27-year high of 5.6% by the end of the month. While yields have since eased back, the market sell-off was driven by investor concerns over growing supply-demand imbalances, stemming from unease over the lack of fiscal consolidation and reduced demand from traditional long-dated bond purchasers like pension funds. For 10-year gilts, by late September, sticky inflation, resilient activity data and a hawkish Bank of England kept yields elevated over 4.70% although by late December had fallen back again to a little over 4.50%.

- The FTSE 100 fell sharply following the “Liberation Day” tariff announcement, dropping by more than 10% in the first week of April - from 8,634 on 1 April to 7,702 on 7 April. However, the de-escalation of the trade war coupled with strong corporate earnings led to a rapid rebound starting in late April. As a result, the FTSE 100 ended June at 8,761, around 2% higher than its value at the end of March and more than 7% above its level at the start of 2025. Since then, the FTSE 100 has enjoyed a further 4% rise in July, its strongest monthly gain since January and outperforming the S&P 500. Strong corporate earnings and progress in trade talks (US-EU, UK-India) lifted share prices and the index hit a record 9,321 in mid-August, driven by hopes of peace in Ukraine and dovish signals from Fed Chair Powell. September proved more volatile and the FTSE 100 closed September at 9,350, 7% higher than at the end of Q1 and 14% higher since the start of 2025. Future performance will likely be impacted by the extent to which investors’ global risk appetite remains intact, Fed rate cuts, resilience in the US economy, and AI optimism. A weaker pound will also boost the index as it inflates overseas earnings. In early November, the FTSE100 climbed to a record high just above 9,900. By late December, the index had clung on to most of those gains standing at 9,870 on 23 December.

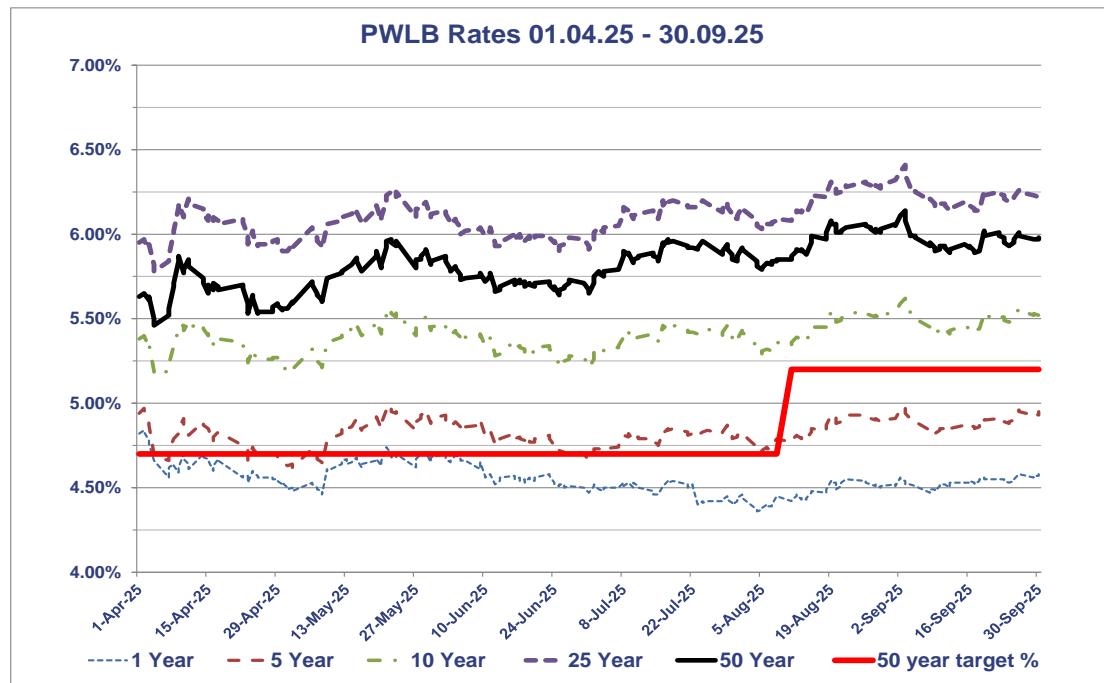

MPC meetings: 8 May, 19 June, 7 August, 18 September, 6 November, 18 December 2025

- There were six Monetary Policy Committee (MPC) meetings held between April and December. In May, the Committee cut Bank Rate from 4.50% to 4.25%, while in June policy was left unchanged. In June’s vote, three MPC members (Dhingra, Ramsden and Taylor) voted for an immediate cut to 4.00%, citing loosening labour market conditions. The other six members were more cautious, as they highlighted the need to monitor for “signs of weak demand”, “supply-side constraints” and higher “inflation expectations”, mainly from rising food prices. By repeating the well-used phrase “gradual and careful”, the MPC continued to suggest that rates would be reduced further.
- In August, a further rate cut was implemented. However, a 5-4 split vote for a rate cut to 4% laid bare the different views within the Monetary Policy Committee, with the accompanying commentary noting the decision was “finely balanced” and reiterating that future rate cuts would be undertaken “gradually and carefully”. Ultimately, Governor Bailey was the casting vote for a rate cut but with the CPI measure of inflation expected to reach at least 4% later this year, the MPC was wary of making any further rate cuts until inflation begins its slow downwards trajectory back towards 2%.
- With wages still rising by just below 5%, it was no surprise that the September meeting saw the MPC vote 7-2 for keeping rates at 4% (Dhingra and Taylor voted for a further 25bps reduction). Moreover, the Bank also took the opportunity to announce that they would only shrink its balance sheet by £70bn over the next 12 months, rather than £100bn. The repetition of the phrase that “a gradual and careful” approach to rate cuts is appropriate suggested the Bank still thought interest rates will fall further.
- At the 6 November meeting, Governor Bailey was once again the deciding vote, keeping Bank Rate at 4% but hinting strongly that a further rate cut was imminent if data supported such a move. By 18 December, with November CPI inflation having fallen to 3.2%, and with Q2 GDP revised down from 0.3% q/q to only 0.2% q/q, and Q3 GDP stalling at 0.1%, the MPC voted by 5-4 to cut rates further to

3.75%. However, Governor Bailey made it clear that any further reductions would require strong supporting data, and the pace of any further decreases would be slow compared to recent months. The markets expect Bank Rate to next be cut in April.

PWLB RATES 01.04.25 - 30.09.25

This chart shows the PWLB interest rates for lending products between 1 year and 50 years for the first half of 2025/2026.

HIGH/LOW/AVERAGE PWLB RATES FOR 01.04.25 – 30.09.25

The below table reports the spread of variation in interests across the first half of 2025/2026 for each of the PWLB lending products from 1 year to 50 years.

	1 Year	5 Year	10 Year	25 Year	50 Year
01/04/2025	4.82%	4.94%	5.38%	5.95%	5.63%
30/09/2025	4.58%	4.95%	5.53%	6.23%	5.98%
Low	4.36%	4.62%	5.17%	5.78%	5.46%
Low date	04/08/2025	02/05/2025	02/05/2025	04/04/2025	04/04/2025
High	4.84%	4.99%	5.62%	6.41%	6.14%
High date	02/04/2025	21/05/2025	03/09/2025	03/09/2025	03/09/2025
Average	4.55%	4.82%	5.40%	6.11%	5.83%
Spread	0.48%	0.37%	0.45%	0.63%	0.68%

5.4 TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND COUNTERPARTY RISK MANAGEMENT

SPECIFIED INVESTMENTS: All such investments will be sterling denominated, with **maturities up to a maximum of 1 year**, meeting the minimum 'high' quality criteria where applicable. (Non-specified investments which would be specified investments apart from originally being for a period longer than 12 months, will be classified as being specified once the remaining period to maturity falls to under twelve months.)

NON-SPECIFIED INVESTMENTS: These are any investments which do not meet the specified investment criteria.

A variety of investment instruments will be used, subject to the credit quality of the institution, and depending on the type of investment made, it will fall into one of the above categories.

The criteria, time limits and monetary limits applying to institutions or investment vehicles are:

	Minimum credit criteria / colour band	** Max % of total investments / £ limit per institution	Max. maturity period
DMADF – UK Government	Yellow	100%	6 months (max. is set by the DMO*)
UK Gilts	Yellow		5 years
UK Treasury Bills	Yellow		364 days (max. is set by the DMO*)
Bonds issued by multilateral development banks	Yellow		5 years
Money Market Funds CNAV	AAA	100%	Liquid
Money Market Funds LNAV	AAA		Liquid
Money Market Funds VNAV	AAA		Liquid
Ultra-Short Dated Bond Funds with a credit score of 1.25	AAA	100%	Liquid
Ultra-Short Dated Bond Funds with a credit score of 1.5	AAA	100%	Liquid
Local Authorities	Yellow	100%	5 years

Term Deposits with Housing Associations	Blue Orange Red Green No Colour		12 months 12 months 6 months 100 days Not for use

CDs or Corporate Bonds with Banks and Building Societies	Blue Orange Red Green No Colour		12 months 12 months 6 months 100 days Not for use
Gilt Funds	UK sovereign rating		

* DMO – is the Debt Management Office of HM Treasury

Accounting treatment of investments. The accounting treatment may differ from the underlying cash transactions arising from investment decisions made by this Council. To ensure that the Council is protected from any adverse revenue impact, which may arise from these differences, we will review the accounting implications of new transactions before they are undertaken.

5.5 APPROVED COUNTRIES FOR INVESTMENTS

This list is based on those countries which have sovereign ratings of AA- or higher, (we show the lowest rating from Fitch, Moody's and S&P) and also, (except - at the time of writing - for Hong Kong and Luxembourg), have banks operating in sterling markets which have credit ratings of green or above in the MUFG Corporate Markets creditworthiness service.

Based on lowest available rating (as at 23.12.25)

AAA

5.6 TREASURY MANAGEMENT SCHEME OF DELEGATION

(i) Full council

- receiving and reviewing reports on treasury management policies, practices and activities;
- approval of annual strategy.

(ii) Cabinet

- approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices;
- budget consideration and approval;
- approval of the division of responsibilities;
- receiving and reviewing regular monitoring reports and acting on recommendations;
- approving the selection of external service providers and agreeing terms of appointment.

(iii) Audit Committee

- reviewing the treasury management policy and procedures and making recommendations to the responsible body.
- Mid-Year Treasury Management Report
- Annual Treasury Report (Actuals)

5.7 THE TREASURY MANAGEMENT ROLE OF THE SECTION 151 OFFICER

The S151 (responsible) officer

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit;
- recommending the appointment of external service providers.
- preparation of a Capital Strategy to include capital expenditure, capital financing, non-financial investments and treasury management, with a long-term timeframe (say 20+ years – *to be determined in accordance with local priorities.*)
- ensuring that the Capital Strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the Council
- ensure that the Council has appropriate legal powers to undertake expenditure on non-financial assets and their financing
- ensuring the proportionality of all investments so that the Council does not undertake a level of investing which exposes the Council to an excessive level of risk compared to its financial resources
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long-term liabilities
- provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- ensuring that members are adequately informed and understand the risk exposures taken on by the Council
- ensuring that the Council has adequate expertise, either in house or externally provided, to carry out the above
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed, to include the following ([TM Code p54](#)): -
 - *Risk management (TMP1 and schedules), including investment and risk management criteria for any material non-treasury investment portfolios;*
 - *Performance measurement and management (TMP2 and schedules), including methodology and criteria for assessing the performance and success of non-treasury investments;*
 - *Decision making, governance and organisation (TMP5 and schedules), including a statement of the governance requirements for decision making in relation to non-treasury investments; and arrangements to ensure that appropriate professional due diligence is carried out to support decision making;*

- *Reporting and management information (TMP6 and schedules), including where and how often monitoring reports are taken;*
- *Training and qualifications (TMP10 and schedules), including how the relevant knowledge and skills in relation to non-treasury investments will be arranged.*
