Project description and comments	Target Date	
Develop and support partnerships with key stakeholders to deliver improved health and wellbeing for West Norfolk Residents drawing on outcomes of Health and Wellbeing Strategy and Marmot recommendations Assistant Director Health, Wellbeing and Public Protection comments: Marmot principles in development of new strategies and delivery of programmes in West Norfolk (Pride in Place, Economic Strategy and Active Norfolk Place Expansion). Increased use of asset based community development (ABCD) approach. Q2 actions: Completion of project and asset mapping work to identify work in West Norfolk and how it is already or could use Marmot principles to ensure health inequalities are addressed. Launch of Health and Wellbeing Partnership 2026, funding applications for projects aimed at addressing health inequalities. Support the NHS Neighbourhood Health plan to ensure effective delivery of community based health model.	Oct 2026	G 
Develop 5-year Strategy for Leisure and Culture ensuring growth and additional partnership working Assistant Director Leisure and Culture comments: Following the insourcing of Alive, the strategic objectives for Leisure and Culture are now fully integrated with the Council's corporate priorities. A Service Outcomes Framework has been developed, aligned to the LGA Local Outcomes Framework, with service-specific targets agreed through to 2026 to demonstrate delivery against corporate outcomes. Corporate KPIs have been reviewed and refined to better reflect service maturity, with a greater focus on measurable outcomes, impact and contribution to the Council's strategic objectives. Recognising the Local Government Reorganisation transition over the next two years, shorter-cycle planning has been introduced to maintain agility and responsiveness, alongside the development of a forward capital investment programme to support long-term sustainability and future priorities. The service is now fully embedded within the Council's strategic planning and performance framework, providing clearer accountability, stronger alignment with corporate objectives, and a more robust evidence base for future investment and service development. 	Average number of working days lost to sickness absence per temporary employee FTE (cumulative)	3.67	1.54				-	(7)

Position summary

1. The full year permanent staff numbers show a slight increase in the establishment required to provide key projects such as fly-tipping which without the additional resources could not be provided.
2. Voluntary turnover rate remains within the anticipated turnover levels and at this point of the year is slightly lower based on last years figures, but numbers do change over the year.
3. In line with the turnover figure, based on last years total number is slightly lower, but this could change throughout the year. The starters based on last years total year is slightly higher, and again will balance out through the year. It is to be reminded that leavers and starters from permanent roles should be read in isolation from each other due to the time between resignation of one employee and start date for a new employee, which often spans any particular quarter
4. The number of days lost to sickness absence is lower than 2025/2026. HR are supporting proactive management to address sickness absence issues and are actively monitoring compliance by liaising with managers regarding targets for return to work reviews and case reviews.
5. Number of employees who have had a period of long term sickness is slightly higher than this time last year. The number of long term sickness cases will fluctuate and are measured cumulatively.
6. Apprenticeship number decreased due to removal of funding for level 7.
7. Number of temporary posts includes staff on short- and long-term contracts, fixed term contracts and apprenticeships throughout the Council, and remains constant from the previous year.
